Why Privacy Nexus?

Privacy Nexus is the ideal solution for privacy management in the hospitality industry. Their software also helps your organization demonstrate compliance of privacy regulations (GDPR, CCPA), all in a simple and practical way. Their in-house developers in coordination with VENZA's privacy consultants means a continuous optimization of Privacy Nexus.

All-in-One solution

To ensure that your organization gets the most out of the software, we offer an all-in-one solution.

This Includes

- ✓ An unlimited number of users
- ✓ Unlimited use of all modules
- ✓ Access to multiple languages
- ✓ Always access to the latest modules and functionalities
- ✓ User support

Dashboard

Use Privacy Nexus' real-time Dashboard to get a quick and clear overview of what is going on with your privacy administration.

Incidents & Data Breaches

Keep a record of all security incidents and data leaks that occur in your organization and handle them quickly and efficiently.

Data Subject Requests

Manage all data subject requests from one place by adding them to your registry and tracking their progress.

Third-Party Management

Automatically check the privacy compliance of your third party suppliers and upload corresponding processing agreements.

Inventory

Create a registry of processing activities that is easy to manage. Save time and effort by using the predefined data items and templates.

DPIA

Conduct Data Protection Impact Assessments to identify privacy risks and take appropriate measures to minimize them.
